YOUR LOCAL DEALER

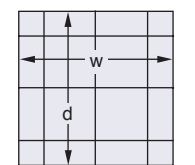

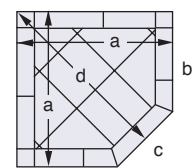

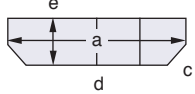

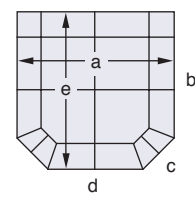

CLASSIC EDGE PADS

Beauty and protection. Our Classic Edge hearth pads have a smooth sweeping edge that mirrors the lines on many of today's and yesterday's stoves. They are the foundation to a perfect stove installation. A Classic Edge hearth pad sets off your stove and ties the whole room together.

Beauty. Choose from 10 beautiful colors from rustic Flagstone to the sophisticated Sonora/Siena. Available in 4 standard shapes and 15 sizes, we make a pad to fit your needs. Don't see the size you need? We love custom orders. Read more about customization at right.

Protection. Hearth Classics takes the guesswork out of ember and thermal protection. Because some new stoves require more thermal protection than stoves in the past, all Hearth Classics hearth pads are fully non-combustible using our ThermaShield technology. See details at right.

THERMA SHIELD™

Nowadays, with wood stoves burning cleaner and hotter than ever before, a standard ember protector hearth pad may not meet the requirements of your stove. Recognizing this need, Hearth Classics developed ThermaShield pads, the highest R-Value hearth pads on the market. Fully non-combustible, with an R-value of 1.01, ThermaShield pads act as a thermal barrier in addition to protecting from falling embers. This protects both what's above the pad and the floor beneath. Because all our hearth pads are made with ThermaShield technology, Hearth Classics takes the guesswork out of choosing the right protection. All our pads are certified to meet or exceed UL1618 and ULC-S632-99. Whether you're burning gas, pellets, corn, coal, oil or wood, our hearth pads offer the best protection on the market - and they look great too.

THERMA SHIELD XTREME™ FLOOR PROTECTION SYSTEM

For stoves that require R-values even greater than R=1.01, the award-winning ThermaShield Xtreme Floor Protection System offers the ultimate in thermal protection. Consisting of a ThermaShield hearth pad and ThermaShield pedestal, the system is available in a range of R-values. Our new low profile base, at 1½" provides an R-value of R=3.19. Our 6" and 10" pedestals can increase your protection from R=1.01 to R=10. Please check with your stove dealer or owner's manual before buying your hearth pad.

WALL PADS AND PEDESTALS

Our wall pads are attractive and in many cases can reduce clearances to a combustible wall. Available for flat walls or corners.

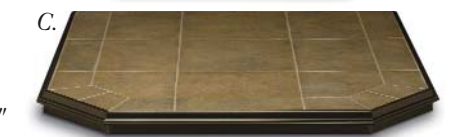

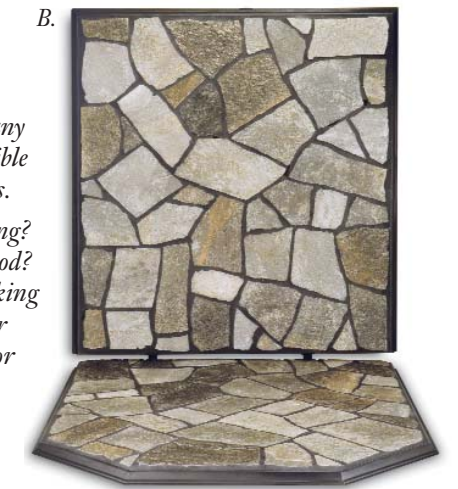

Want to raise your stove for better viewing? Don't feel like bending over to load wood? Our matching pedestals are a good looking way to raise your pad 6" or 10". Our new Low-Profile pedestal is perfect for installations over carpet.

A. 6" pedestal. Available in all sizes.

B. Wall pads ship with mounting brackets for easy installation.

C. Low-Profile ThermaShield Xtreme pedestal with R=3.19

D. 10" pedestal. Available for pads 36" or smaller.

CUSTOM & DECORATIVE INLAYS

We specialize in custom pads. We can cut a hole for your pipe, make an odd angle to fit your room, use your tile to match the rest of your house, you name it. We also offer an array of beautiful inlays that will draw all eyes to your stove. We can add an inlay to any tiled pad. Your options are endless.
